

Earth Air Simulations

The Collabo-Social Challenge

Build-a-Bike is an activity that integrates fun and purpose. Participants perform various 'tasks', earn parts of the bike and build the bicycles themselves. After completing the activity, bicycles are checked for quality, raced for performance and finally donated to local charities, thereby, allowing participants to gain more than just 'organizational skills.'

Key Features

- 2-3 hours
- 8 to 150 participants
- 8 to 10 participants per team (per bicycle)
- Can be run both indoors and outdoors

Key Learning Outcomes

- Builds team communication skills
- Strengthens problem-solving
- Inspires teamwork towards goals
- Develops resource management skills
- Promotes time management
- Customer First Approach
- Fosters big picture thinking
- Identifies team strengths
